How can we manage our cows economically??

# Importance of Efficient Reproduction

Timely Bred, Healthy Cows

Consistent Calf Crop

Happy Rancher

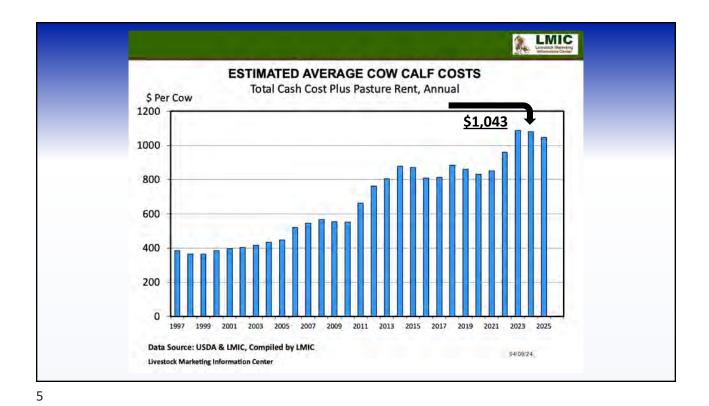

3

#### Where to Start

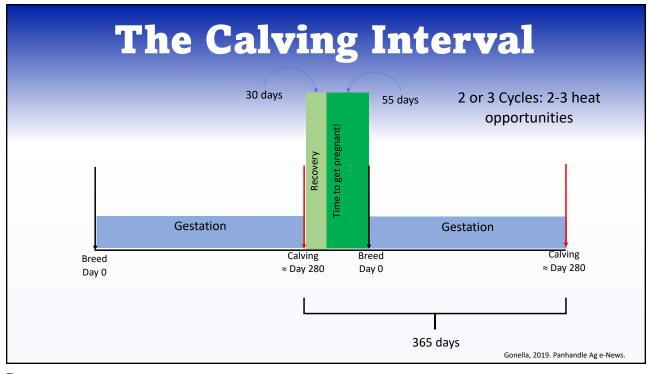

- ❖ Nutritional Requirements + Efficient Cows
- Know Your Costs
- ❖ "Controlled" Calving Season
- **❖** Aim to Increase Weaning Rates & Pounds Weaned
- ❖Implement an Efficient Plan FOR YOU

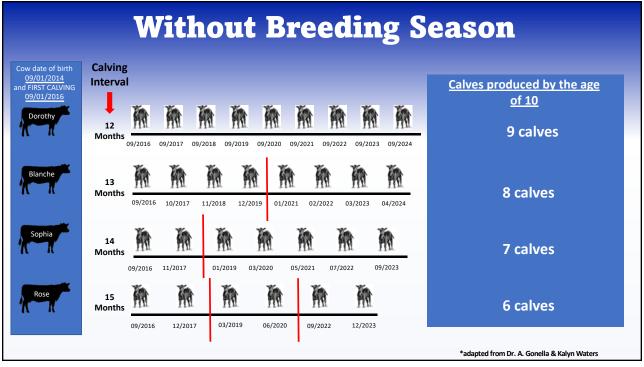

RETURN ON INVESTMENT & PLANNING AHEAD

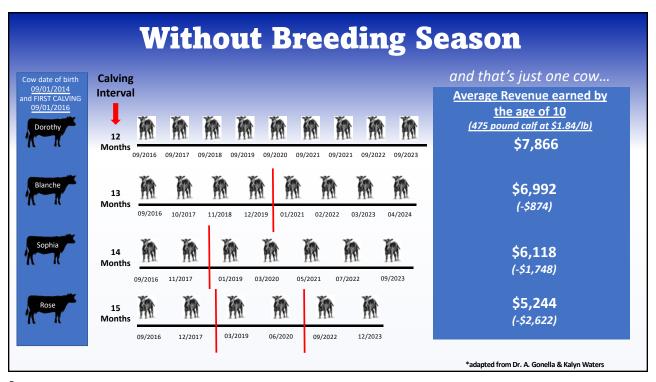

| Know Your Costs            |                         |      |  |  |  |  |
|----------------------------|-------------------------|------|--|--|--|--|
| 8-Year Total               | *Variable Costs Per Cow | Year |  |  |  |  |
| o-real local               | \$610                   | 2017 |  |  |  |  |
| \$5,492/cow                | \$663                   | 2018 |  |  |  |  |
| <b>γ3,432/00W</b>          | \$645                   | 2019 |  |  |  |  |

|                            | \$639                   | 2021 |  |  |  |  |
| Average                    | \$721                   | 2022 |  |  |  |  |
| \$687/cow                  | \$816                   | 2023 |  |  |  |  |
| *Removed land costs (~25%) | \$775                   | 2024 |  |  |  |  |

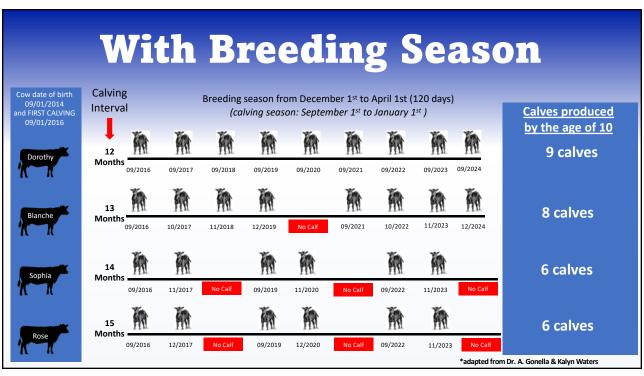

|   | Without Breeding Season  |           |         |         |         |  |  |  |  |
|---|--|-----------|---------|---------|---------|--|--|--|--|
|   | Cow Calving Interval *Total Variable **Total Average Costs Per Cow Revenue 8-Year Return |           |         |         |         |  |  |  |  |
| J | Dorothy  | 12 months | \$5,492 | \$7,866 | \$2,374 |  |  |  |  |
|   | Blanche  | 13 months | \$5,492 | \$6,922 | \$1,430 |  |  |  |  |
|   | Sophia   | 14 months | \$5,492 | \$6,118 | \$626   |  |  |  |  |
|   | Rose   | 15 months | \$5,492 | \$5,244 | \$-248  |  |  |  |  |
|   | *does not include heifer deve<br>**does not include sales from                           |           |         |         |         |  |  |  |  |

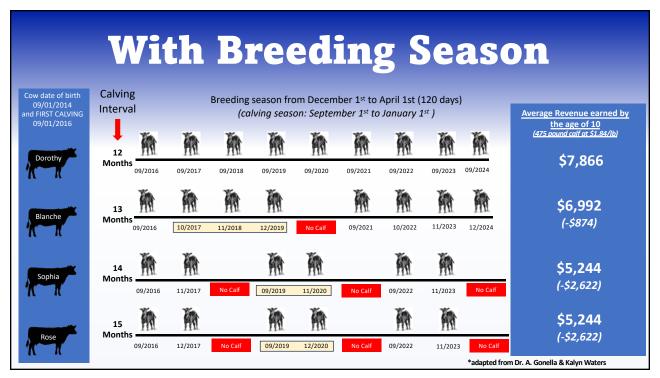

#### **Controlled Breeding Season (pt.1)**

- ❖ More variables that can be "controlled" by a producer:
  - Monitor when efficient cows get bred (time of year)
  - Monitor length of the breeding/calving season
  - Trying to get more cows bred early in the season
  - Sell a more uniform calf crop
- Controlling these variables enables more influence over:
  - Pregnancy Rates
  - Weaning Rates
  - Weaning Weights

11

|   | With Breeding Season   |           |         |         |         |  |  |  |  |  |
|---|--|-----------|---------|---------|---------|--|--|--|--|--|
|   | Cow Calving Interval *Total Variable **Total Average Costs Per Cow Revenue 8-Year Return |           |         |         |         |  |  |  |  |  |
| J | Dorothy  | 12 months | \$5,492 | \$7,866 | \$2,374 |  |  |  |  |  |
|   | Blanche  | 13 months | \$5,492 | \$6,922 | \$1,430 |  |  |  |  |  |
|   | Sophia   | 14 months | \$5,492 | \$5,244 | \$-248  |  |  |  |  |  |
|   | Rose   | 15 months | \$5,492 | \$5,244 | \$-248  |  |  |  |  |  |
|   | *does not include heifer deve<br>**does not include sales from                           |           |         |         |         |  |  |  |  |  |

#### **Controlled Breeding Season (pt.2)**

- ❖ More variables that can be controlled by a producer:
  - When cows get bred (time of year)
  - Length of the breeding/calving season
  - ❖ Trying to get more cows bred early in the season
  - ❖ Sell a more uniform calf crop
- Controlling these variables enables more influence over:
  - Pregnancy Rates
  - Weaning Rates
  - Weaning Weights

15

#### **Controlled Breeding Season**

Comparison example

❖80% weaning rate = 80 calves
